ENTERPRISE ON-MOBILE

RUN YOUR BUSINESS
ANYWHERE AND EVERYWHERE

Smartphone usage has tremendously increased in the recent past with availability of large scale of useful applications. Employees are started using smartphones for their professional work too, be it checking emails, editing documents etc. To work with their enterprise application still they have to access their laptops/desktops and this is becoming a bottleneck in this technology dominated world.

It's the time to bring your enterprise application to mobile platform and increase the productivity along with employee experience.

People Tech Group (PeopleTech) has developed a unique innovative solution to take your enterprise application to mobile without compromising on security
– ENTERPRISE ON-MOBILE.

WITH ENTERPRISE ON-MOBILE

- ⊗ Extend any enterprise application to mobile platform

- ⊗ Implement BYOD (Bring Your Own Device) in your organization to get the work done

- ⊗ Employees can access required data and work from any where

- ⊗ Raise a request, update the work status, fill timesheets and approve the pending requests etc.

- ⊗ No delays in decision making

- ⊗ Sync your field workers into daily reporting structure

KEY FEATURES

DESIGN
The application is fluidic in nature and uses the latest UI technology which is designed through our User Centered Design approach

PERSONALIZATION
