For Higher Education

One point solution to analyze and quickly see all the impacted objects during the split and also estimate the amount of work involved in completing the Split project.

- Application custom built in PeopleSoft
- Tool gives an easy-to-use interface
- Generates reports on all the impacted objects
- Analyzes any delivered custom online objects and batch objects (e.g. SQR)
- Easy user interface to view overall object categorization and the impact
- Analysis of PS Query and SQL objects
