

# PEOPLESOFT UPDATE MANAGER

## PEOPLESOFT UPDATE MANAGER

With the arrival of the new PeopleSoft Update Manager (PUM), the maintenance and functionality of PeopleSoft 9.2 has been simplified and redefined. PUM is a tool that breaks up a big upgrade application into small and easy to apply updates. It increases the way that consumers update and patch their PeopleSoft application with PUM. PeopleTech will help you to maintain the Lifecycle of the Application Management through PUM.

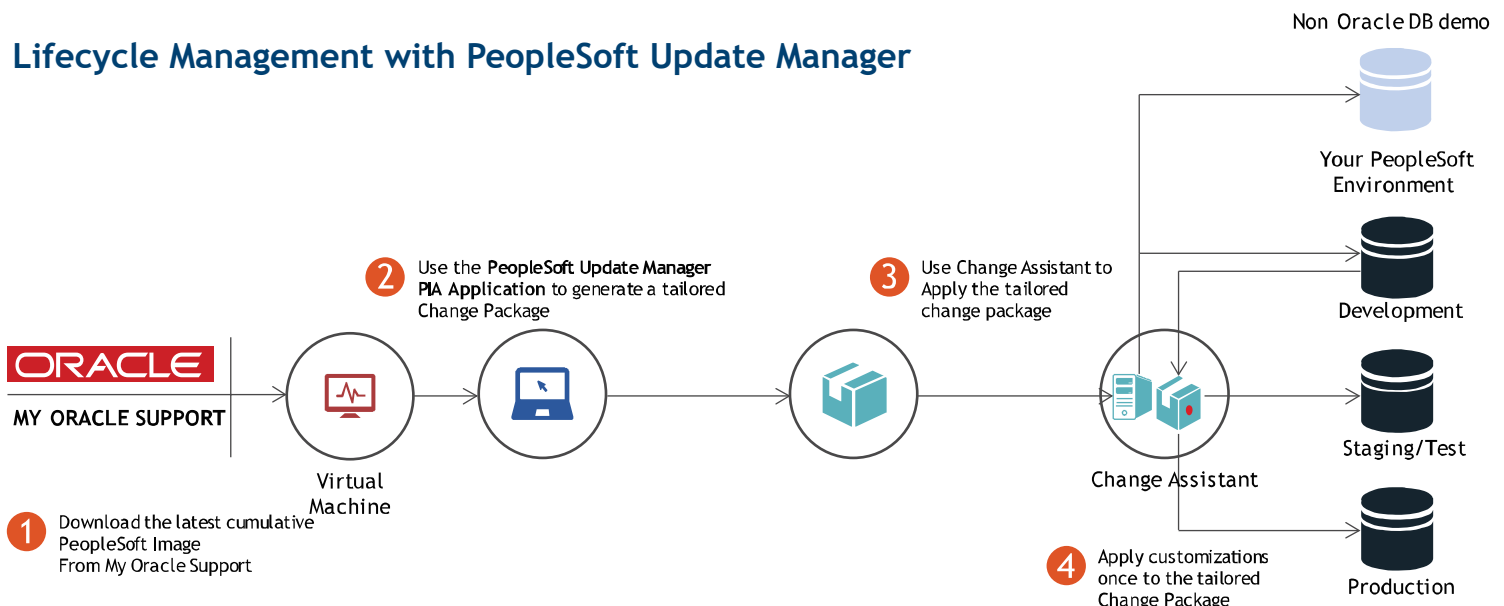

### KEY DELIVERING UPDATES WITH PUM

Through PUM you can perform the following updates:

- ✔ **PeopleSoft Update Image (PI):** Delivered on a regular schedule. It consist of the PeopleSoft Update PIA Application.
- ✔ **PeopleSoft Release Patchset (PRP):** Individual fixes for the expedited issues were sent in between regularly scheduled PI deliveries.
- ✔ **Proof-of-Concept (POC) patches** - POCs patches are available to specific customers for very specific issues.
- ✔ **New Features and Enhancements** - New features will be delivered in a PI when they are made generally available.

## Lifecycle Management with PeopleSoft Update Manager

## APPLICATION MAINTENANCE AND BEST PRACTICES

PUM is changing the way of improving the maintenance process for PeopleSoft 9.2 applications by providing a single PeopleSoft Image that covers all of the up-to-date features and the most up to date bugs, patches, or fixes. In the past, customers had to wait until they were developed and added into new release that was brought as an upgrade. Three different strategies are:

### Proactive

- ✔ Regularly download PI when released
- ✔ Can use at any moment of time
- ✔ Easier to apply for all fixes

### Selective

- ✔ Regularly download PI
- ✔ Apply only updates related to business
- ✔ Provides ability to enhanced plan and schedule maintenance activities

### Reactive

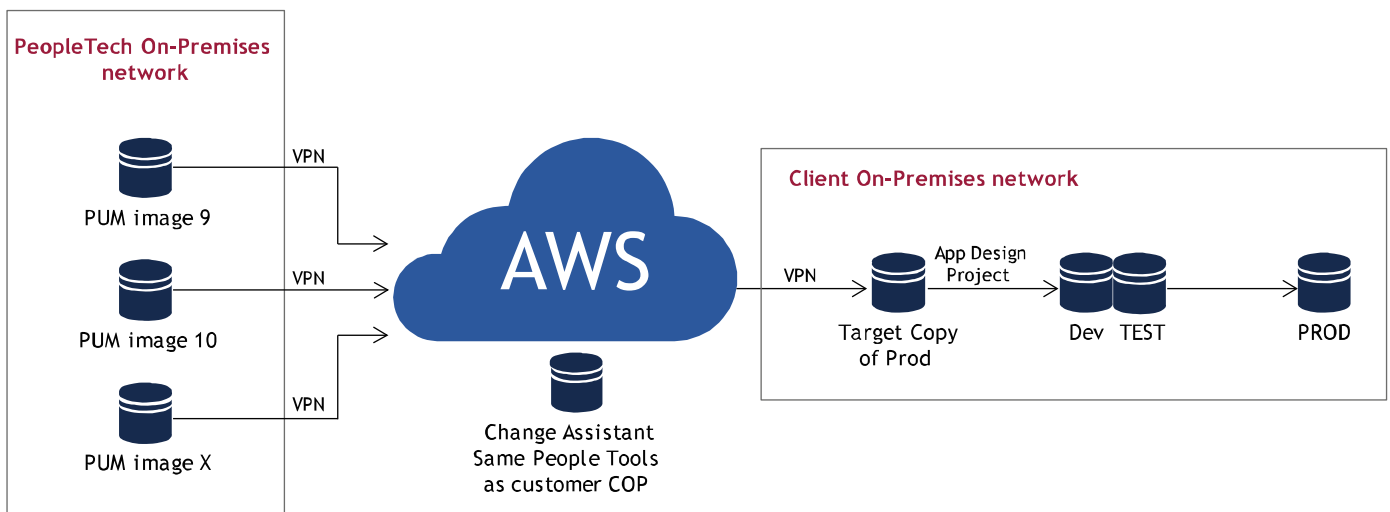

- ✔ Download current PI and check for releasing fixes
- ✔ Only apply fixes when issues encountered

## BENEFITS OF PUM

- ✔ Allows to avoid future costs allied with the standard upgrade cycle
- ✔ Speed up the delivery of new competencies into your business
- ✔ Allows to stay updated with maintenances

## PEOPLETECH'S AWS HOSTED SERVICE FOR PUM

## BENEFITS WITH PEOPLETECH

- ✔ In-house PeopleSoft CoE and Oracle certified resources
- ✔ Delivery of PUM through Custom Cloud
- ✔ Manage your application with a single solution
